

Videoconferencing Support

For Tandberg – Polycom – Lifesize Systems

Why do so many AV and telecommunications integrators rely on AV TechSource for video conferencing installation, setup and support?

- Our technicians have decades of experience with the leading teleconferencing products.
- We have Tandberg Certified Technical Experts on staff, we are factory trained by Polycom, and we can service and support Lifesize systems.
- We are certified for infrastructure products –bridges, servers, and firewall traversal systems– as well as single and multipoint systems.
- Our expertise extends to IP systems as well as ISDN.
- Use AV TechSource for complete video conferencing system design, installation, setup and meeting support.

Acting in your best interests

Planning to purchase a portable or set-top video conferencing system? Go ahead and buy it from the dealer you choose, then contact us to provide you with expert, reasonably-priced system installation.

Don't know what you need? We will recommend the best solution.

While our strategic partners can provide almost any equipment, we are an independent provider of video conferencing services and video conferencing setup. We will always strive to act in your best interests.
