High Security Wireless Keyboards

No more anxiety when typing sensitive data. Wireless Computing's extended-range wireless keyboards now include encryption to protect against illicit interception of passwords, financial data, account numbers and other typed information.

It's a win-win. Sensitive information stays secure, and you present like a pro from up to 100 feet away. Find out how at Booth #2529.

Contemporary Reserach iC-Web Display Manager

Contemporary Research introduces the iC-Web Display Manager, a complete, self-contained solution for web-based networking of a facility's TVs, plasma displays, and video projectors. Combined with iC-Net technology that networks displays through existing CATV coax, the iC-Web server features onboard Web pages for system setup, direct control, preset commands, and scheduling.
