

Nationwide Service and Support

LOCAL RELATIONSHIPS – NATIONAL SERVICE

USAV Group is a national network of leading professional Audio and Video integration dealers. Our goal is to leverage the experience and core competencies of our integrators to meet your AV requirements locally and throughout the United States.

USAV dealers are recognized as the foremost AV integrators in their markets. By working together as part of the USAV team, these regional leaders are able to design, integrate, install, support, and manage AV solutions on a nationwide basis.

SINGLE POINT OF CONTACT FOR DELIVERING SOLUTIONS

When you expand your audio, video, videoconferencing, and digital signage systems into multi-state installations, your local USAV integrator remains your single point of contact. When your installation is in a state where your local integrator does not have an office, the integrator contacts the USAV integrator in that region and requests resources to meet your needs.

If a service call is required after installation, you conveniently contact your primary integrator who quickly coordinates the service call with another nearby integrator who is part of the USAV team.

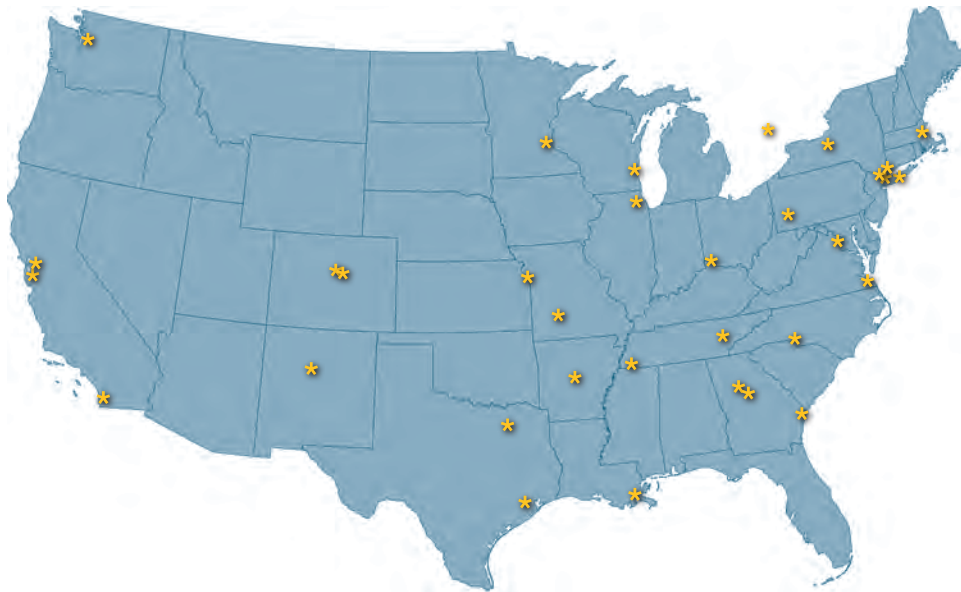

CONSISTENT QUALITY OF SERVICE

As communication and presentation requirements of our clients increase in the 21st century, they require consistent quality of service across their enterprise.

USAV members have over 350 engineers and technicians who regularly exchange information about new products, technologies and procedures. In addition, every USAV member provides continuing education to the technical staff.

By sharing resources, mandating training and standardizing on best practices, USAV integrators consistently provide the highest quality of service to our clients.
