

DECISION 2008

COVERAGE

- 5:30 NIGHTLY NEWS
- 8 PM PRESIDENTIAL DEBATE

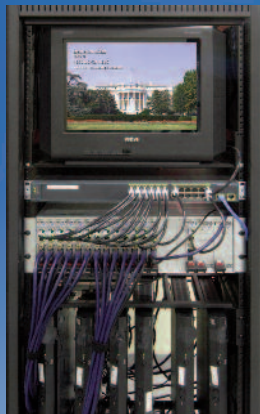

WHY SETTLE FOR THIS?

...WHEN YOU CAN HAVE SUPERB DIGITAL VIDEO DELIVERED TO YOUR HIGH-RESOLUTION CLASSROOM PROJECTORS?

WHY PUT YOUR SATELLITE OR CABLE SERVICES ON OLD NOISY CRT MONITORS?

The era of digital television is here. You can have crisp, high-resolution video delivered to new or existing projectors via the IP network you already have.

Visit us at the TIES Conference in Minneapolis to find out how –and to see this new technology demonstrated.

You'll learn how RAV Technologies and Visionary Solutions can rid you of outdated RF backbone systems by bringing crisp, clean cable or satellite channels to your classrooms over your existing IP network.

**Call RAV Technologies at 763-544-4400 for details.
Or visit us at TIES Education Technology Conference 2008
(Booth 414 - December 8 to 9)**
